

LNGnet Training Course No. 4 - *LNG market structure, organisation and arrangements*

The LNGnet Project has been launched in Spring 2021 by the European Commission to enhance the liquidity, flexibility, transparency and sustainability of the global LNG market. The Project aims at deepening the engagement of partner countries in liquid and flexible global LNG trade, and to increase their understanding of EU gas and LNG market policies and practices, including on the envisaged decarbonisation of the gas sector in line with the EU's climate objectives.

Within the LNGnet Project, Training Courses are offered, dealing with: Gas market design, structure and regulation; LNG market structure, organisation and arrangements; Decarbonisation, gases and LNG. Courses are free of charge and reserved for energy experts from Ministries, Government Agencies and other public bodies in charge of energy, energy companies and their associations, major energy consumers, academia.

Training Course No. 4 will be about:

LNG market structure, organisation and arrangements

and is reserved for experts from **East Asia**, including: **Myanmar, Thailand, Vietnam, Cambodia, Malaysia, Singapore, Brunei, Indonesia, Philippines, China, Japan, South Korea, Taiwan.**

This Course will be held in **Bali, Indonesia** between **February 7 – 9, 2023.**

The draft Program is attached and includes the following topics:
